

PIG CROP REPORT

JUNE 1966

Release:
June 22, 1966
12:00 Noon (E. D. T.)

The December 1965-May 1966 pig crop totaled 47.0 million head, up 10 percent from the 42.9 million head for the same period a year earlier, according to the Crop Reporting Board. A total of 6.4 million sows farrowed during this period, 8 percent more than the 5.9 million for the corresponding period last year. The number of pigs per litter averaged 7.33 compared with 7.22 a year earlier.

Reports of breeding intentions indicate 5.7 million sows to farrow during June-November 1966 period, 10 percent more than the 5.2 million sows that farrowed during the same period last year. If these intentions are carried out and if the number of pigs per litter equal the average plus an allowance for trend, the June-November 1966 pig crop will total 41.8 million head, 10 percent above last year. The 1966 annual pig crop (December 1965 through November 1966) would then be 88.8 million head, 10 percent more than in 1965.

The June 1, 1966 inventory of hogs and pigs on farms in the 10 Corn Belt States totaled 45.0 million head, 7 percent more than the 42.2 million head on hand June 1, 1965.

1/ Does not include Alaska and Hawaii.

2/ As indicated by breeding intentions reports.

3/ Average number of pigs per litter, with allowance for trend used to compute indicated June-November pig crop. Number rounded to nearest 100,000 head.

HOGS ON FARMS JUNE 1, 1966 - 10 CORN BELT STATES

Hogs and pigs of all ages on farms June 1, 1966 totaled 45,048,000 head, 7 percent above the 42,238,000 a year earlier, but 6 percent less than the June 1, 1964 inventory. These 10 States normally produce three-fourths of the United States pig crop.

Hog numbers were greater than a year earlier in each of the 10 States. In Iowa, the leading hog producing State, numbers were up 5 percent from a year earlier and in Illinois, second ranking State, 4 percent. Increases in the other States were 5 percent in Minnesota, 7 percent in Nebraska and Kansas, 8 percent in Ohio, 9 percent in Wisconsin and Missouri, 11 percent in Indiana, and 13 percent in South Dakota. June 1 inventories this year were up 19 percent from March 1, compared with an increase of 12 percent during this period in 1965.

The number of hogs and pigs on farms June 1, being kept for breeding in the 10 States totaled 6,893,000 head, up 10 percent from a year earlier. Other hog and pig numbers totaled 38,155,000 head, 6 percent more than the 35,999,000 on June 1 last year. By weight classes, the number of other hogs and pigs (intended principally for marketing) on farms June 1, 1966 and the percentage change from a year earlier are: less than 60 pounds, 20,804,000 head, up 8 percent; 60-119 pounds, 8,524,000 head, up 7 percent; 120-179 pounds, 5,228,000 head, up 1 percent; 180-219 pounds, 2,702,000 head, down 1 percent; 220 pounds and over, 897,000 head, the same as a year earlier.

DECEMBER 1965-MAY 1966 PIG CROP UP 10 PERCENT

The U. S. pig crop for the 6-month period December 1965 through May 1966 totaled 47,025,000 head, 10 percent more than the 42,853,000 head a year earlier. Increases over a year earlier by regions were as follows: East and West North Central, each up 9 percent; North Atlantic, up 10 percent; South Central up 13 percent; South Atlantic, up 14 percent; and the West up 10 percent.

December-May sow farrowings were 2 percentage points more than indicated by farmers' intentions as of December 1, 1965. December-May farrowings and intentions reported last December as a percentage of a year earlier by regions are: North Atlantic, 111 percent now and 102 percent in December; East North Central 107 and 106; West North Central 107 and 105; South Atlantic 114 and 113; South Central 113 and 113; West, 107 and 107.

The number of pigs per litter averaged a record 7.33 in the December-May period compared with an average of 7.22 reported a year earlier. Average litter size increased from a year earlier in all regions except the North Atlantic. Overall conditions were generally favorable for winter and spring farrowings in the heavy hog producing States.

Farrowings during the December-May period were up in all months as compared with a year earlier as follows: December farrowings 5 percent; January 8 percent; February 4 percent; March 5 percent; April 12 percent; and May up 12 percent.

The December 1965-February 1966 pig crop in the 10 Corn Belt States totaled 12,232,000 head, 7 percent more than the December-February 1965 crop of 11,407,000 head. Sows farrowing in the 10 States during this period totaled 1,665,000 head, 6 percent more than the 1,578,000 sows farrowed in the comparable period a year earlier. Pigs per litter averaged 7.35 compared with 7.23 a year earlier.

The March-May 1966 pig crop in the 10 Corn Belt States totaled 24,326,000 head, 10 percent more than the 22,167,000 head for the comparable period of 1965. Sows farrowing in the 10 States during this period totaled 3,307,000 head, 8 percent more than the 3,065,000 head farrowed a year earlier during the same period. Pigs per litter averaged 7.36 compared with 7.23 a year earlier.

JUNE-NOVEMBER INTENTIONS UP 10 PERCENT

June 1 reports from farmers on breeding intentions indicate that 5,728,000 sows will farrow in the United States during June-

November 1966. This is a 10 percent increase from the 5,222,000 sows farrowing during the corresponding period of 1965 but is still below the average. Increase in sow farrowings from June-November last year are indicated in all regions. Increases by regions are as follows: North Atlantic, up 7 percent; East North Central, up 9 percent; West North Central, up 7 percent; South Atlantic, up 15 percent; South Central, up 18 percent; and the West, up 12 percent.

If intentions for June-November farrowings materialize and the number of pigs per litter equals the average plus an allowance for trend, the pig crop for the period will total 41,800,000 head, 10 percent more than a year earlier and reversing the downward trend of the past several years. The combined pig crop for 1966 would be 88,825,000 head, 10 percent above the 1965 pig crop.

Sows bred and intended for farrowing in 10 Corn Belt States during June, July and August in 1966 total 2,185,000 head, 9 percent more than a year earlier. All of these States show expected increases ranging from 7 percent in Iowa to 16 percent in South Dakota. Expected farrowings by months in the 10 States are: June, 762,000 sows, up 7 percent from June 1965; July, 661,000 sows, up 16 percent; and August, 762,000 sows, up 7 percent.

Reported breeding intentions indicate 2,087,000 sows to farrow during the September-November quarter in the 10 States. This number of sows would be 7 percent more than a year earlier. Increases are indicated in all of these States, ranging from 3 percent in Nebraska to 18 percent in Indiana.

CROP REPORTING BOARD:
